

GRASP WORKSHOPS

Take control of your research project

The Graduate Research Advanced Skills Program (GRASP) series of workshops is designed to enable Higher Degree by Research students of all faculties take control of their research project from the beginning. See our program of GRASP workshops on the reverse and register online.

To grasp means to firmly take hold of something - but also to comprehend and understand. The GRASP program facilitated by Curtin University Library aims to enable students to take control of their research project from the beginning, and develop transferable skills in searching, reading, thinking and writing to produce a first class research outcome for both the student and the university.

'Advanced skills' in research means the knowledge, capabilities, dispositions and practices which enable the HDR student to achieve excellence in producing a long dissertation and shorter works in the form of academic papers. The GRASP program aims to enhance essential research skills by providing HDR students with opportunities to participate in workshops, seminars, and writing groups and to access a range of online resources.

The program also aims to promote awareness of the need for effective and ethical communication in terms of the documentation, presentation and publication of research results.
